Passionate Junior Software Developer with strong problem-solving skills and a real desire to learn more. I face challenges with patience and never give up until I find a solution. Coding feels like bringing all the pieces of the puzzle together for me, which I love. With my careful attention and aim of getting things right, I'm excited to keep learning and making a difference.

### **Technical skills**

**Language:** JavaScript, using Node.js and browsers as environment

**Testing:** Test Driven Development(TDD), Jest, Supertest

**Back-end:** SQL, PSQL, seeding, migrations

**Front-end:** HTML, CSS, React, Lighthouse, and other accessibility tools

**Hosting:** Cloudflare, Netlify

**Other:** Paired programming, technical communication, SDL, Agile and SCRUM methodologies

### **Projects**

**Plan-Perfect** - A React-Native/Expo front-end-based mobile app that utilises Firebase authentication and Firebase Firestore as a back-end to create a user experience. Plan Perfect, a holiday organisation tool, allows users to create travel itineraries for any vacation they wish to have, with ease, whilst remaining local to their own profile.

**Nc-News-Back-End** - Backend API for the NC News platform. It provides endpoints for managing articles, comments, users, and topics.

**NC-News-Front-End** - NC News is a platform for users to log in, browse articles by topic or date, sort by popularity, vote, comment, and delete their comments.
